

Vaccine Storage Quick Reference

REMEMBER: Improperly stored or outdated vaccines won't protect your patients!

- This reference includes vaccines approved or authorized in the United States. It does not include travel vaccines. For additional details, refer to vaccine package inserts (www.immunize.org/official-guidance/fda/pkg-inserts).
- If you have a concern about the condition of any vaccine upon arrival or while it is in storage, **take action!** Follow the steps on Immunize.org's "Vaccine Storage Emergency Response Worksheet" and document the situation on the "Vaccine Storage Troubleshooting Record" (see *Additional Resources* #1 and #2).

STORE VACCINES AT APPROPRIATE TEMPERATURES

Refrigerator (most vaccines)

► **Maintain between 2°C and 8°C (36°F and 46°F) Aim for 5°C (41°F)**

- Any combination vaccine containing only refrigerated components listed below
- COVID-19 2024–2025 formulations:
 - Comirnaty (age 12+ yrs)
 - Novavax EUA
- Dengue (Dengvaxia)
- DTaP, Tdap, Td (all)
- Hepatitis A (all)
- Hepatitis B (all)
- *H. influenzae* type b (Hib, all)
- Human papillomavirus (HPV)
- Influenza (all)
- MMR (MMR II, Priorix)*
- Meningococcal (all)
- Pneumococcal (all)
- Polio (IPV)
- Rabies (all)
- RSV (Arexvy, Abrysvo)
- RSV monoclonal antibody
- Rotavirus (all)
- Zoster/Shingles (Shingrix)

Vaccine diluents: All may be stored in the refrigerator; certain diluents may be stored at room temperature (see *Additional Resources* #3).

Freezer

► **Maintain between -50°C and -15°C (-58°F and 5°F)**

- COVID-19 2024–2025 Moderna formulations
- MMR (MMR II only)*
- MMRV
- Mpox (Jynneos)
- RSV (mResvia)
- Varicella

Vaccine diluents: Do not freeze.

Ultra-Cold Freezer

► **Maintain between -90°C and -60°C (-130°F and -76°F)**

- COVID-19 2024–2025: Pfizer-BioNTech EUA (age 6 mos through 11 yrs)

Special Cases

Certain vaccines may be frozen until their expiration date or may be stored in a refrigerator for several weeks before use. Once thawed, **DO NOT REFREEZE**.

Refrigeration time (use within allowable time or until expiration, whichever is first):

- COVID-19 2024–2025 formulations:
 - All Moderna formulations — *up to 60 days in refrigerator*
 - Pfizer-BioNTech EUA (age 6 mos through 11 yrs) — *up to 10 weeks in refrigerator*
- Mpox (Jynneos) — *up to 8 weeks in refrigerator*

* MMR: MMR II (Merck) may be stored until expiration in a freezer or refrigerator. Store Priorix (GSK) only in the refrigerator.
